TECHNOLOGY

CORTLAND FLY LINE TECHNOLOGY ICONS

WELDED LOOPS

Our welded loops make rigging fast, easy and reliable. We take extra care to make certain our loops are strong, secure and durable.

SHOOTING TECHNOLOGY

Our proprietary Shooting
Technology (ST) gives the jacket a
harder finish and noticeably
stiffer coating. The ST coating
delivers a reduced-friction
performance with a glass smooth
finish and remains a key element
in line slickness over its life span.

FIFTY PLUS CORE

Our 50+ Core is built for the most demanding species found all over the world. Core strength of more than 50lbs allows anglers to put maximum drag and pressure on a fish without compromising the taper design or line density.

COLD TEMPERATURE

Ideal use in 30 - 50 degree (F) temperatures

TECHNOLOGY

HIGH FLOATING DYNA-TIP

Our proprietary Dyna-Tip technology significantly reduces the density of our fly line tips so they float higher in the surface film resulting in better line management and leader flotation.

POLYETHYLENE

Our Liquid Crystal lines are built with a blend of Polyethylene compounds (PE) over a monofilament core resulting in the toughest, slickest-shooting floating fly lines. Our core and PE coating are permanently fused preventing delamination.

TOP SECRET

Cortland's new (Top Secret)
technology is a highly abrasion
resistant, soft, supple material
allowing for superior knot
strength while remaining virtually
clear under water.

WARM TEMPERATURE

Ideal use in 50-70 degree (F) temperatures

HEAT-TEMPERED SURFACE TREATMENT

Our proprietary HTx (Heat Tempered X) coating is an after process that incorporates extreme slickness additives. The coating seals out dirt and oils while maintaining an exceptionally low friction coefficient.

GRIP SET

Cortland's technology feature Grip Set (GS) is designed to give the angler a better hook set when targeting large game fish or fish with hard mouths.

HANG MARKERS

Cortland's new Hang Technology is a seamless highly visible color transition identifying when it's time to fish the "hang" during a retrieve.

TROPICAL TEMPERATURE

Ideal use in 70 + degree (F) temperatures

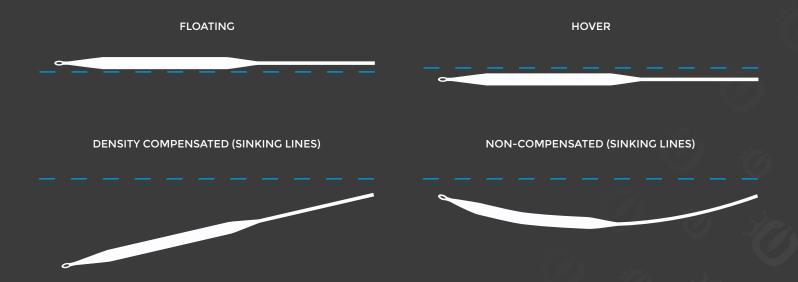

AFFTA APPROVED

COMPETITION BRAID CORE

FRESHWATER | 90' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

Feeling the take is of major importance when fishing modern nymphing techniques, and we've designed the latest edition of our competition lines with this in mind.

- · Super-thin, strong and sensitive Braided Core
- Ultra-thin diameter launches your bugs with precision
- Offered in both level and double taper versions

SIZE LEVEL	.022
SIZE DT	.022

17 ^

FRESHWATER | 90 ' | FLOATING

CORE: MONOFILAMENT

GECKO GREEN

The keys to nymphing are feeling the strike and setting the hook, our Competition Mono Core lines excel at both.

- · Built with a proven taper and thin, hard monofilament core
- Perfectly round, stiff core transfers energy better and reduces line sag
- Also available in a .022 level taper

FO-TECH FLOAT

FRESHWATER | 130' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

The new FO-Tech Floating line features an aggressive 43ft head design and a 130ft overall line length. The unique taper design loads quickly and shoots smoothly. Ideal for fishing from a boat or bank angling when floating lines are needed. A color change at the head and running line ensures line control and promotes better shoot-ability.

- Quick Loading
- Aggressive Taper
- Extreme Distance

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

FO-TECH INTERMEDIATE

FRESHWATER | 130' | INTERMEDIATE / FLOAT

CORE: BRAIDED NYLON MULTIFILAMENT

Cortland's new FO-Tech Intermediate sinks at 2-3 inches per second. Built with an aggressive taper to load rods quickly in a boat or when angling from a bank. Perfect sink rate for fishing flies just under the surface at far distances.

- Quick Loading
- Subsurface Presentations
- Sink Rate 2-3 IPS

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

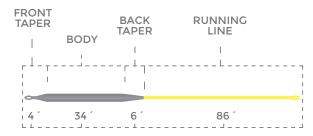

FO-TECH TYPE 3

FRESHWATER | 130' | TYPE 3 / INTERMEDIATE

CORE: BRAIDED NYLON MULTIFILAMENT

The new FO-Tech Type 3 fly line is built for fishing flies below the surface when intermediate lines aren't getting you down enough. The aggressive taper design and a 130ft overall line length gives you an ideal sinking line when long casts are needed.

- Sink Rate 3-4 IPS
- Density Compensated
- Extreme Distance

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

FO-TECH TYPE 5

FRESHWATER | 130' | TYPE 5 / INTERMEDIATE

CORE: BRAIDED NYLON MULTIFILAMENT

Our new FO-Tech Type 5 sinking line puts your flies deeper in the water column when fish are down. The density compensated sinking material gives you a perfect presentation in the water column. An ideal color change at the head and running line ensures line control and promotes better shoot ability.

- Sink Rate 5-6 IPS
- Density Compensated
- Extreme Distance

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

FRONT RUNNING **BACK TAPER TAPER** LINE **BODY** 34 ' 6 ′ 86 '

FO-TECH TYPE 7

FRESHWATER | 130' | TYPE 7 / INTERMEDIATE

CORE: BRAIDED NYLON MULTIFILAMENT

The FO-Tech Type 7 is our fastest sinking distance line. Ideal for when fish are deep and out of reach of your competition, the aggressive heavy taper design makes casting long range and getting deep easy.

- Sink Rate 7-8 IPS
- Density Compensated
- Extreme Distance

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

HOVER

FRESHWATER | 110' | HOVER

CORE: BRAIDED NYLON MULTIFILAMENT

Cortland's new Hover line is designed to sit literally right under the surface film and STAY THERE! The neutral density line is built on a long level tapered head to ensure a consistent presentation.

- Level Head Design
- Distance
- 110ft Overall Length

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

SLOW INTERMEDIATE

FRESHWATER | 110' | SLOW INTERMEDIATE

CORE: BRAIDED NYLON MULTIFILAMENT

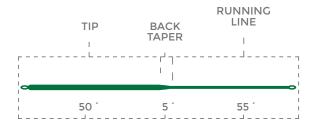

The New Slow Intermediate features a long level taper head design and sinks at an ideal rate of 1 Inch Per Second. Built to fish flies just below the surface film, the new Slow Intermediate will fool spooky and finicky fish.

- Level Head Design
- Distance
- Sink Rate 1 IPS

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

MEDIUM INTERMEDIATE

FRESHWATER | 110' | MEDIUM INTERMEDIATE

CORE: BRAIDED NYLON MULTIFILAMENT

Our new Medium Intermediate sinks at 1.5-2 Inches Per Second and features two hang markers at 14ft & 24ft. Hang markers indicate when it's a perfect time to hang your flies. An aggressive density compensated taper design allows flies to properly sink to effective depths.

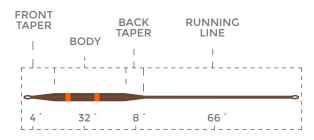

- Hang Markers
- Density Compensated
- Sink Rate 1.5-2 IPS

TYPE 3 LEVEL SINK

FRESHWATER | 110' | TYPE 3 SINKING

CORE: BRAIDED NYLON MULTIFILAMENT

The Level Sink Type 3 featuring Cortland's new Hang technology is an aggressive density compensated line. The 110ft overall line length allows anglers to cast long distances. Hang markers at 14ft & 24ft let you know when it's time to hang your flies.

- Sink Rate 3-4 IPS
- Density Compensated
- Hang Markers

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

TYPE 5 LEVEL SINK

FRESHWATER | 110' | TYPE 5 SINKING

CORE: BRAIDED NYLON MULTIFILAMENT

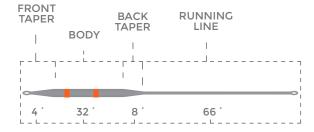

The Level Sink Type 5 features an aggressive density compensated taper design. Built with our Hang technology the bright hang markers at 14ft & 24ft are perfect for knowing when it's time to hang the flies.

- Sink Rate 5-6 IPS
- Hang Markers
- Density Compensated

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

TYPE 7 LEVEL SINK

FRESHWATER | 110' | TYPE 7 SINKING

CORE: BRAIDED NYLON MULTIFILAMENT

Getting your flies down deep and fishing the hang has never been easier with our new Level Sink type 7. Built with an aggressive density compensated taper and featuring hang markers at 14ft & 24ft.

- Hang Markers
- Density Compensated
- Sink Rate 7-8 IPS

SEEK TYPE 5

FRESHWATER | 110' | TYPE 5 SINKING

CORE: BRAIDED NYLON MULTIFILAMENT

The new Cortland Seek Type 5 is built on a unique sinking taper design allowing you to search the depths with a 5-6 Inch Per Second sink rate. An overall line length of 110ft gives you the ability to reach out at greater distances.

- Sink Rate 5-6 IPS
- Slow Sinking Tip
- Fast Sinking Belly

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

SEEK TYPE 7

FRESHWATER | 110' | TYPE 7 SINKING

CORE: BRAIDED NYLON MULTIFILAMENT

Our fastest sinking non-compensated line gets you deep while searching the various depths on the descent. Built with a 110ft overall line length our Seek Type 7 allows you to cast a long distance and get your flies down quickly.

- Sink Rate 7-8 IPS
- Slow Sinking Tip
- Fast Sinking Belly

SIZE WF	5/6	6/7	7/8
GRAIN WEIGHT	195	225	255

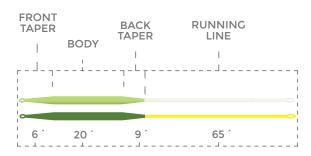

TROUT BOSS

FRESHWATER | 100' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

The Trout Boss just got more boss with a complex new taper, thinner core and our new proprietary heat-tempered surface treatment (HTx).

- 35ft head design helps load fast-action rods and increase line speed
- Thinner core gives the line a smaller diameter-to-mass ratio
- Heat-tempered coating seals out dirt and oils

SIZE WF	3	4	5	6	7	8
GRAIN WEIGHT	120	140	160	185	210	240

FINESSE TROUT II

FRESHWATER | 90' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

Our revolutionary Finesse II is designed for fishing small flies at greater distances in complex currents.

- Hard running line jacket material for longer casts
- Extra-fine diameter front taper
- · Fast-casting, highly accurate

TROUT SERIES

BIG FLY

FRESHWATER | 100' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

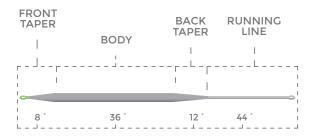

The perfect taper profile for casting large flies or when fishing in heavy winds.

- · Aggressive front taper and over-weighted head
- Low-friction ST coating
- Two-foot Dyna-Tip
- Welded loops at both ends

SIZE WF	5	6	7	8	9	10
GRAIN WEIGHT	160	185	210	240	280	330

INDICATOR NYMPH

FRESHWATER | 100' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

Cortland's Indicator Nymph line makes casting multi-fly indicator rigs a win-win situation.

- Short front taper and robust head
- High-visibility two-foot chartreuse Dyna-Tip
- Acts as indicator when European or high-stick nymphing

SIZE WF	4	5	6	7	8
GRAIN WEIGHT	120	140	160	185	210

TROUT SERIES

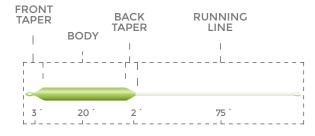

COMPACT SWITCH

FRESHWATER | 100' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

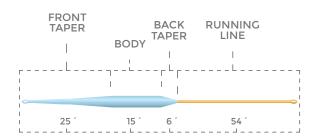

There's a different breed of two - handed casters out there, and a lot of them are fishing with our Compact Switch line.

- Oversized tip, supple lime-green head, and a harder, stiffer running line
- Excels at Skagit-style long-range casts
- 4-6 weights have 25ft heads; 7-8 weights have 28ft heads

SIZE WF	4	5	6	7	8
GRAIN WEIGHT	240	300	375	425	485

SHORT BELLY SPEY

FRESHWATER | 100' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

Our Short Belly Spey line is the right choice for shorter "grilse" rods.

- Rated for 11ft to 13ft Spey rods
- Tapered to effortlessly execute Spey, roll and overhead casts
- 46ft taper; 54ft running line

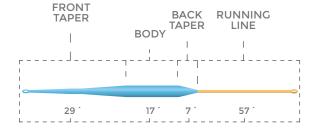

GRAIN	450	500	550	625
WEIGHT				

TWO-HANDED SERIES

MEDIUM BELLY SPEY

FRESHWATER | 110' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

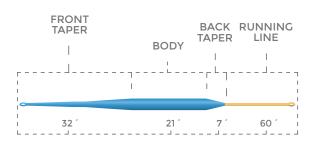

Our Medium Belly Spey line is ideal for most midsized Spey rods.

- Rated for 12ft to 13ft Spey rods
- Tapered for Spey, roll and overhead casts
- 53ft taper; 57ft running line

GRAIN	500	550	600	675
WEIGHT	300	330	000	073

LONG BELLY SPEY

FRESHWATER | 120' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

Our Long Belly Spey line is sized for the longest Spey rods.

- Rated for 13ft to 15ft Spey rods
- Tapered for Spey, roll and overhead casts
- · 60ft taper; 60ft running line

GRAIN	550	600	650	725
WEIGHT		000		, _0

TWO-HANDED SERIES

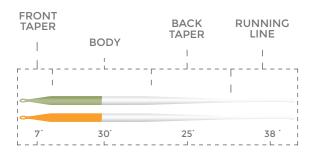

FRESHWATER | 100' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

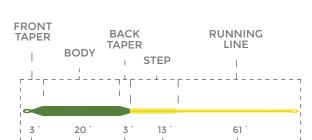

Built to throw nymphs, wet flies, small streamers, dries and bombers, the Omni-Verse is our most versatile long belly line to date.

- 62ft overall head length, featuring a 25ft rear taper for extra-long casts
- Dual welded loops
- · Stealthy moss green head
- Hi-Vis orange head

SIZE WF	4	5	6	7	8	9	10
GRAIN WEIGHT	120	140	160	185	210	240	280

COMPACT FLOAT

FRESHWATER / SALTWATER | 100' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

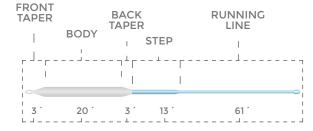

Cortland's Compact Float features a full floating short, compact, aggressive head design that loads deep and shoots an extreme amount of line with minimal false casts.

- · Braided nylon multi-filament core
- Slick and supple proprietary HTx coating
- Color change for easy identification when it's time to re-cast or shoot line

SIZE WF	5/6	6/7	7/8	9/10	11/12
GRAIN WEIGHT	200	240	275	350	425

COMPACT INTERMEDIATE

FRESHWATER / SALTWATER | 100' | INTERMEDIATE / FLOATING

CORE: MONOFILAMENT

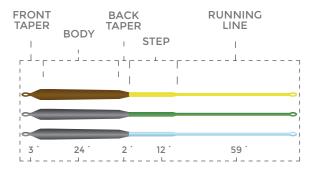

The Compact Intermediate, with Cortland's heat-tempered HTx surface technology, features a compact head that delivers quick, accurate casts with minimal false casting.

- Compact head for quick casts
- · Clear intermediate head is invisible to fish
- Sky-Blue running line indicates when it's time to pick up and recast

SIZE WF	5/6	6/7	7/8	9/10	11/12
GRAIN WEIGHT	200	240	275	350	425

COMPACT SINK TYPE 3 / 6 / 9

FRESHWATER / SALTWATER | 100' | SINKING / INTERMEDIATE

CORE: MONOFILAMENT

Cortland's Compact Series Sinking lines are designed to be the most versatile sinking line on the market.

- Rated all temperature conditions
- 28ft sinking head is paired with a translucent-colored intermediate running line

SIZE WF	5/6	6/7	7/8	9/10	11/12
GRAIN WEIGHT	200	240	275	350	425

FRESHWATER / SALTWATER | 100' | SINKING / FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

Quick Descent lines are the perfect choice for getting down deep – and fast.

- Type 6 sinking
- · Beefy, elongated rear taper
- · Easily loading

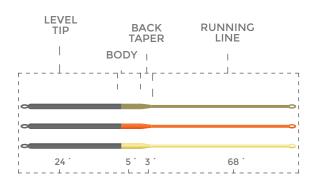

SIZE WF	5/6	7/8	8/9
GRAIN WEIGHT	200	250	300

GHOST TIP 5

FRESHWATER / SALTWATER | 90' | INTERMEDIATE / FLOATING

CORE: MONOFILAMENT

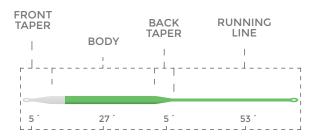

A clear, 5ft intermediate tip line that's ideal for fishing lake depths from the surface film to 5 feet or for nymphing in rivers and streams.

- 5ft Clear tip
- Easy Handling
- · Monofilament core

SIZE WF	5	6	7
GRAIN WEIGHT	140	160	185

GHOST TIP 15

FRESHWATER / SALTWATER | 90' | INTERMEDIATE / FLOATING

CORE: MONOFILAMENT

A clear, 15ft intermediate tip line that's ideal for fishing lake depths from 5 to 15 feet.

- 15ft Clear tip
- Easy Handling
- Monofilament core

SIZE WF	5	6	7	8	9	10
GRAIN WEIGHT	140	160	185	210	240	280

DENNY RICKARDS

FRESHWATER | 90' | INTERMEDIATE / FLOATING

CORE: MONOFILAMENT

Our Denny Rickards 7ft Clear Camo Tip was designed to be fished in the top two feet of water over weed beds and along shorelines when pupa, emergers or actively swimming nymphs bring trout up from the bottom to feed.

- Intermediate tip stays higher in water column
- Can be picked up with minimal surface disturbance
- Clear Camo Tip / Olive Green

SIZE WF	5	6	7
GRAIN WEIGHT	140	160	185

"The opportunity to share with fellow fly fishers, through the SECRET LABORATORY at Cortland, is my great privilege! Let's see how much trouble we can get into."

- FLIP PALLOT

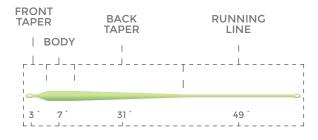

TARPON TAPER

SALTWATER | 90' | FLOATING

CORE: MONOFILAMENT

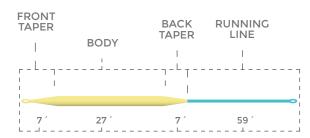

Built with our hard, durable and smooth Tropic Plus coating on a solid monofilament core to withstand the blistering heat of long hours on the deck of a flats skiff.

- Overweight head and short front taper
- Casts with accuracy and control
- High-floating for quick pick-ups

SIZE WF	10	11	12
GRAIN WEIGHT	280	330	380

ALL PURPOSE TAPER

SALTWATER | 100' | FLOATING

CORE: MONOFILAMENT

The Tropic All Purpose Taper is our best all-around hot weather floating line for multi-species saltwater fly fishing.

- Long-body, weight-forward taper to cast larger flies in windy conditions
- Monofilament core with hard-finished coating
- Shoots smoothly and stays tangle free in extreme tropical heat

SIZE WF	6	7	8	9	10	11	12
GRAIN WEIGHT	160	185	210	240	280	330	380

TROPIC PLUS SERIES

GT / TUNA

SALTWATER | 100' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

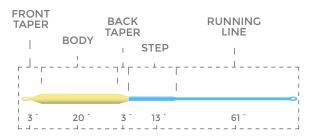

Cortland's Tropic Plus GT / Tuna line features Grip Set (GS) technology and a super durable braided nylon multifilament core.

- 50+LB multifilament core
- Tropic Plus jacket
- Designed for Giant Trevally and Tuna

SIZE WF	11	12	13
GRAIN WEIGHT	330	380	450

TROPIC COMPACT

SALTWATER | 100' | FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

Ideal for throwing large air resistant flies or punching a cast into the wind, the Tropic Plus Compact stays slick and hard in extreme heat.

- Aggressive short head design
- Dual welded loops
- Grip Set and Shooting Technology

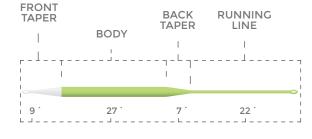

SIZE WF	5/6	6/7	7/8	9/10	11/12
GRAIN WEIGHT	200	240	275	350	425

TROPIC PLUS SERIES

BILLFISH INTERMEDIATE

SALTWATER | 65' | INTERMEDIATE / FLOATING

CORE: MONOFILAMENT

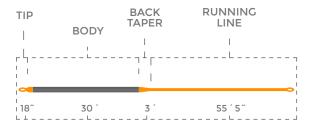

The Tropic Plus Billfish line features a 9ft clear intermediate tip to allow the use of shorter leaders without spooking fish.

- · Heavy monofilament core
- Tropic Plus coating
- Dual welded loops

SIZE WF	13	14	15
GRAIN WEIGHT	430	480	530

BILLFISH SINKING

SALTWATER | 90 ' | SINKING / FLOATING

CORE: BRAIDED NYLON MULTIFILAMENT

The new Tropic Plus "Billfish Sinking" line features a 30ft heavy sinking head with a bright orange tip (18in) and running line. The bright orange tip allows you to track your leader/fly through the prop wash while the 50lb braided nylon core gives you extreme stopping power. Built with our premium tropic jacket material allowing the line to stay stiff and slick in the hottest conditions.

- HI-VIS tip
- 30ft sinking head
- 50lb core

SIZE WF	13-15
GRAIN WEIGHT	600

TROPIC PLUS SERIES

HI-VIS FLIP

SALTWATER | 100' | FLOATING

CORE: MONOFILAMENT

Designed by the legendary Flip Pallot, our new HI-VIS FLIP fly line is highly visible and excels in both short and long-range casts. The short powerful taper profile allows the line to load the rod in tight and carry energy through the leader when it's needed to reach out at distances. This multipurpose line is built for the angler targeting a variety of species.

- Highly Visible
- Short Belly Taper
- Loads Quickly

SIZE WF	6	7	8	9	10	11
GRAIN WEIGHT	185	210	240	280	330	380

HEAVY SINK

SALTWATER | 100' | SINKING / INTERMEDIATE

CORE: BRAIDED NYLON MULTIFILAMENT

Cortland's new Tropic Plus Series "Heavy Sink" is built with a stiff tropic jacket and a highly abrasion resistant 50lb core. The 30ft fast sinking head paired with a super slick intermediate running line allows you to get your fly down deep to the most demanding species. An over-sized running line prevents tangles and increases grip for hard hook sets.

- 30ft Sinking Head
- 50lb Core
- Over Sized Running Line

GRAIN	400	450	500
WEIGHT	100	150	300

TROPIC PLUS SERIES

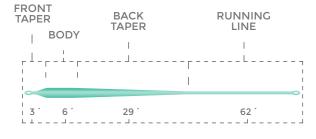

SALTWATER | 100' | FLOATING

CORE: MONOFILAMENT

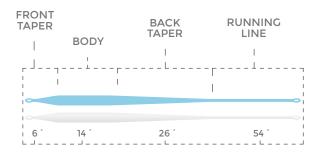

Built for today's modern action rods and for when guides demand the best performance from their clients, our new Liquid Crystal Guide Taper has equal ability to perform quick shots and shoot long distances.

- Hard PE+ coating provides super-smooth finish
- Minimal line stretch
- · Highly abrasion-resistant, durable

SIZE WF	5	6	7	8	9	10	11	12	13
GRAIN WEIGHT	150	170	200	225	260	305	355	415	475

ULTRA PREMIUM FLUOROCARBON TIPPET

With extensive research, development, and field testing, we are proud to announce the most premium Fluorocarbon trout tippet offering on the market. This tippet is formulated with a "Top Secret" blend giving it the perfect balance of knot strength, suppleness, and abrasion resistance.

LENGTHS	30yo	30yd 100yd									
SIZES	ОХ	0X 1X 2X 3X 4X 5X 6X 7X 8X									
BREAK STRENGTH	15.9lb	12.9lb	10.9lb	9.6lb	8.4lb	5.7lb	3.9lb	2.9lb	1.9lb		

NYLON TIPPET

Cortland's new copolymer Nylon Tippet is super-strong and highly abrasion resistant. The high tensile strength, controlled stretch, and smooth finish are a perfect combination, providing more suppleness with outstanding knot strength.

LENGTHS	30yo	30yd 100yd								
SIZES	ОХ	0X 1X 2X 3X 4X 5X 6X 7X								
BREAK STRENGTH	15.3lb	12.9lb	10.8lb	9lb	7.5lb	5.5lb	4.3lb	2.5lb		

FLUOROCARBON TIPPET

Our Fluorocarbon Trout Tippet provides high strength and abrasion resistance, low underwater visibility and excellent knot strength for fishing in situations where extreme stealth is required.

LENGTHS	30yo	d							
SIZES	ОХ	1X	2X	3X	4X	5X	6X	7X	8X
BREAK STRENGTH	12lb	10lb	9lb	7lb	5.5lb	4.5lb	3.1lb	2lb	1.7lb

INDICATOR MONO LEADER MATERIAL

Cortland offers a lineup of indicator monofilament, intended to help you build visible leaders that help with strike detection.

Available in three color options: bicolor (red/yellow), yellow and white.

LENGTHS	50ft					
SIZES	.009in	.010in	.011in	.012in	.013in	.014in
BREAK STRENGTH	8lb	9LB	10.5lb	11.8lb	12.4lb	13.9lb

FLUOROCARBON TAPERED LEADER

Cortland's new Fluorocarbon leaders are built to be virtually invisible under water and have incredible knot strength. These new leaders are built with an elongated taper design allowing for more positive turnover and less wind knots. Each leader comes with a pre-tied perfection loop for easy rigging.

LENGTHS	9ft							
SIZES	ОХ	1X	2X	3X	4X	5X	6X	7X
BREAK STRENGTH	12.5lb	11.2lb	9.9lb	8lb	6lb	5.2lb	3.8lb	2.5lb

NYLON TAPERED LEADER - 2 pack

Our new Nylon Tapered trout leaders are extruded from high-tenacity copolymers for an exceptional blend of abrasion resistance and knot strength. The supple nylon material ensures flies are presented delicately, while the stiff butt section provides power to the fly for long casts. Each leader comes with a pre-tied perfection loop for easy rigging.

LENGTHS	7.5ft	7.5ft 9ft 12ft 15ft								
SIZES	ОХ	0X 1X 2X 3X 4X 5X 6X 7X

SALTWATER LEADERS & TIPPET

SALTWATER FLUOROCARBON TIPPET

Cortland's new Fluorocarbon material incorporates a glass smooth, virtually invisible finish with superior knot strength and abrasion resistance. This new proprietary blend of fluorocarbon is designed specifically for the demands of hardcore anglers and the species they pursue.

LENGTHS	30yo	30yd 100yd								
SIZES	6lb	8lb	12lb	16lb	20lb	25lb	30lb	40lb		
	50lb	60lb	80lb	100lb						

IGFA LEADER MATERIAL

Not every angler is looking to set a world record, but for those who are enter Cortland's new IGFA Leader Material, IGFA Leader Material is designed to have the perfect blend of stiffness and diameter in relation to its break strength. This new material is formulated to fall within the IGFA specs in each class size while maintaining all the necessary performance characteristics needed.

LENGTHS	30yd 100yd						
SIZES	4lb	6lb	8lb	10lb	12lb	16lb	20lb

MONOFILAMENT LEADER MATERIAL

Cortland's new Nylon Leader Material was designed with extensive research giving you an ultra-premium offering for building custom leaders. This new blend of nylon has the perfect balance of knot strength, suppleness, durability and abrasion resistance. Smaller sized spools are ideal for wade anglers fishing the flats and larger spools to keep in the boat or truck.

LENGTHS	30yo	d 100	yd

	50lb	60lb	80lb	100lb				

SALTWATER NYLON TAPERED LEADER - 2 pack

These all-purpose Saltwater Leaders are made from premium medium stiff nylon for the best combination of knot strength and abrasion resistance. Designed with a long butt section and aggressive taper these new Saltwater leaders turn over heavy fly patterns. Ideal during windy conditions or when you need to ensure a more positive leader turnover. Each leader is built with a pre-tied perfection loop for easy rigging.

LENGTHS	9ft	12ft			
SIZES	8lb	10lb	12lb	16lb	20lb

SALTWATER LEADERS & TIPPET

SST 10 STAINLESS STEEL LEADER

SST 10 is a supple, nylon-coated, multistrand stainless-steel leader material that knots easily but is tough enough to stand up to the sharpest teeth. SST 10 is for every size and shape of toothy species, from northern pike and musky to bluefish.

LENGTHS	10ft
SIZES	10lb 15lb 20lb 35lb 50lb

TIPPET RINGS TIPPET & LEADER ACCESSORY

Cortland tippet rings are made from high quality stainless steel and finished in stealthy nickel black. They are the perfect solution for super-fast rigging of leader to tippet connections, Strong and lightweight, perfect for dry fly, nymphing and streamer fishing.

MICRON BACKING

Cortland Micron is the standard by which all fly line backing has been judged for more than 50 years. World famous for its tight, round braid, smooth low-friction finish and stretch-resistant performance, Micron is manufactured from premium Dacron fibers. Unlike looser, flat braids, Micron comes with zero twist, is virtually tangle-free and knots perfectly every time.

COLOR	YELLOW PINK BLUE ORANGE WHITE
LB TEST	20 30
SPOOL SIZE (YDS)	100 (20lb) 250 1000 2500

GEL SPUN BACKING

Cortland's Gel Spun backing is made from super-high-strength gel-spun fibers, braided to exact specifications. The tight, round braid allows you to pack a lot of backing onto small spools.

COLOR	YELLOW PINK BLUE WHITE

WEIGHT	6-7IPS (10GPF) 8-9IPS (15GPF) 10+IPS (20GPF)
SPOOL SIZE (FT)	150 500
NEW SIZE	6-7IPS (25GPF) 50Ib CORE 150ft

SHOOTING/RUNNING LINE EXTENSION

Cortland's Shooting / Running Line is ideal for use with shooting heads or "chuck'n duck" fishing with split shot. Built on a braided nylon multi-filament core with a stiff, hard finish, this line shoots beautifully and resists tangling when retrieved.

COLOR	MINT GREEN
LENGTH	100ft
LEVEL SIZE	.027in .031in .035in .040in

FLY LINE BACKING & EXTENSIONS

MODERN FLY LINE CARE

While PVC and PE are very durable and able to withstand hard use, they can be damaged by abuse. Most quality fly lines will last for many seasons if they're cared for properly. So here are a few suggestions that will help you maximize the usable life of your new Cortland fly line.

Fly line picks up microscopic bits of dirt, grit and algae which adhere to the surface of the PVC and PE in an almost invisible film. A dirty line will not float as high as a clean line. And, the grit clinging to a very dirty line can abrade the polished surface of the PVC or PE when it shoots through the guides which reduces its slickness and accelerates the deterioration of the line.

Whatever you do, NEVER use vinyl treatments and other spray cleaners because they are likely to damage the coating on your line.

Fortunately, cleaning a fly line is easy with our new fly line cleaner products. With the proper care and maintenance, your new Cortland fly line should last a long time. So it really pays to follow these common-sense steps.

- Keep it clean
- Treat it sparingly
- Keep it away from high heat and solvents like aerosol spray, insect repellents and sunscreens
- · Be careful not to physically damage the line
- Stretch it

Even better, your line will shoot faster, cast farther and float higher - so you can catch more fish.

FLY LINE CLEANER FLY LINE ACCESSORY

Cortland's new Fly Line Cleaner is offered in a pre-soaked (5) pad capsule or a 2oz bottle with dry pads. These two new offerings allow anglers to clean and dress their line in one application. Our pre-soaked (5) pads are perfectly sized for the wade angler, while the 2 oz bottle is ideal for guides, captains, and anglers looking to clean a lot of lines. Both products include Cortland's proprietary fly line cleaner mix giving you the best silicone-based cleaning and dressing material available.

COMPETITION RODS MKI

European-style nymphing is catching on in the U.S, enter Cortland's Competition rod series. Built from high-modulus, ultra-sensitive graphite blanks, our rods are weighted toward the butt to help maintain the optimum 45-degree angle without tiring your wrist. The rod's coating helps dampen vibration to prevent shock waves when presenting the fly. Black, single-foot guides are oversized to ease leader knot transfers for fishing short distances. And the handle is thin, with an ergonomic taper that allows an angler to touch a finger against the blank for strike detection. These 4-piece rods include hook keepers and fighting butts with hard cork bottoms.

LENGTH	10.5ft
WEIGHT	3wt 4wt

COMPETITION RODS MKI

INTRODUCING THE ALL NEW MKII SERIES FLY RODS

MKII LAKE SERIES

As lake angling grows in popularity across the world, Cortland's new range of lake rods are built to cover every situation. Supple enough to throw a tight loop with a long range floating line, but feature enough power across the blank to effortlessly cast a heavy tungsten sinking line. Designed to fish all lake lines, from floater through intermediate, right through to the real heavyweight modern lines, the most gentle of takes will be transmitted through the blank right to your fingertips. The ultra-premium grade Portuguese cork has been used for the handles, and each of the rods features a comfortable fighting butt for extra control while fighting fish. Single foot guides and a stealthy unpainted finish round these rods off in an extremely tactical, yet attractive manner.

MKII NYMPH SERIES

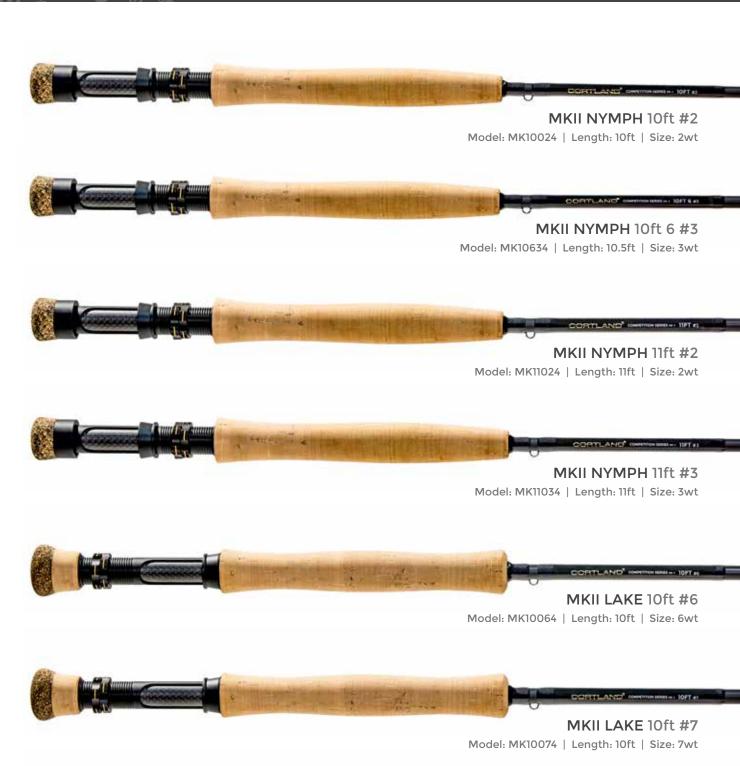

Built using carbon fiber of military grade modulus and resins, these rods have been designed and built utilizing over 30 years of top level competition experience from the Cortland Prostaff. This new and exciting range of "Euro Style" nymphing rods were tested extensively at the World Fly Fishing Championships in Vail, Colorado in September 2016, by many of the World's most successful competition anglers. The balance of the weight and the main power in the butt section paired with a downward locking reel seat for this technique is paramount. An ergonomic fighting butt provides the correct weight distribution and the necessary control to land the larger fish or assist in long days of fighting fish. The tip section is designed to be extremely light and crisp, yet soft enough to protect the finest tippet and not bounce fish. The super lightweight blank is extremely durable and dampens quickly allowing you to feel bites transmitted through the rod. A unique guide design featuring a lowered shooting guide allows knots to transition cleanly, assist in line control, increase shoot-ability, while preventing vibration and noise.

COMPETITION RODS MK II

A size-specific, cloth rod sock and an optic orange rod case for easy location on the river bank.
